The financial statements have been prepared under the historical cost convention.

Turnover

Turnover represents grants receivable principally from Birmingham City Council, under the Grant Aid Scheme and from other institutions and organisations. Grants relating to specific projects are credited to the profit and loss account to the extent that the project has been completed at the balance sheet date, with any ongoing surplus funds being held as accrued income in other creditors to match against future project defrayment.

Taxation

Taxation for the year comprises current and deferred tax. Tax is recognised in the Income and Expenditure Account, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current or deferred taxation assets and liabilities are not discounted.

Current tax is recognised at the amount of tax payable using the tax rates and laws that have been enacted or substantively enacted by the statement of financial position date.

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the statement of financial position date.

Timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements. Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.
